Personal Profile

With over two and a half years of experience as an Engineering Associate, I've built a solid foundation in software development, working primarily with Java, Python, and C++. I enjoy tackling complex problems through algorithms and logical thinking and am strongly interested in full-stack development. What drives me is the opportunity to combine technical know-how with creative problem-solving to build meaningful solutions. I'm always looking to sharpen my skills, stay in tune with industry trends, and explore emerging technologies that can shape the future of software.

Experience

Goldman Sachs

Hyderabad, India

SDE - II

Aug 2022 - Current

- Developed and implemented a data integration pipeline to source data from system, transform it, and store it in the output system. Using Kafka for real-time data streaming and message brokering, Apache Flink for data streaming, Kubernetes for container orchestration, and Spring Boot for building microservices. Ensured seamless data flow and scalability by leveraging distributed architecture, enhancing system reliability and performance.
- Developed and implemented a data integration pipeline to source data from system, transform it, and store it in the output system. Utilized Kafka for real-time data streaming and message brokering, Apache Flink for data streaming, Kubernetes for container orchestration, and Spring Boot for building microservices. Ensured seamless data flow and scalability by leveraging distributed architecture, enhancing system reliability and performance.
- Led a project to transition the DAO layer from SQL to NoSQL, specifically MongoDB
- Enhancement of security protocols by implementing OAuth authentication

Goldman Sachs

Bangalore, India

Intern

June 2021 - July 2021

- Worked on a project that integrated Angular frontend with a Java backend using ReactiveX. Built a listener to detect incoming emails and update the UI in realtime with new entries. Ensured seamless user experience by leveraging reactive programming for efficient data flow.

Education

Cummins College of Engineering for Women

Pune, Maharashtra

BTech in Computer Engineering

Aug 2018 - May 2022

- Arranged various technical workshops as a core team member of Developer Student Clubs (DSC)
- Worked as a Public Relations and Sponsorship head at College's Startup cell
- Conducted a two-month long Android Development program as an Android Study Jams Facilitator
- Courses:** Data Structures and Algorithms, Statistical Theory and Methods, Operating Systems, Microprocessors, Data Science, Artificial Intelligence, Machine Learning, Statistical Learning

Skills

Programming	Java, SpringBoot, Python, Kubernetes, Docker, Kafka, Apache Flink, MongoDB, C/C++, JavaScript, SQL, AngularJS, ReactJS, Django
Miscellaneous	Linux, Shell (Bash/Zsh), Tableau, Microsoft Office, Firebase, Git.
Soft Skills	Time Management, Teamwork, Problem-solving, Documentation, Engaging Presentation.

Projects

Forecasting Stock Market

Pune, India

Blinkads

Aug 2021 - Feb 2022

- Prediction of stock market by using real time financial news, analyst opinions and quotes in order to improve quality of output.
- Proposed a novel method which involves use of hybrid model(involving textual and numeric data) to predict closing price of a stock.
- Designed User-friendly UI in React to showcase real time graphs, and other relevant data.
- Technical Skills:** ReactJS, Python, Maths involving Deep Learning
- Soft Skills:** Time Management, Teamwork, Presentation skills, Report writing.

Stock Recommender Application

Pune, India

Cummins College of Engineering for Women | Citi

- Worked in a team of 5 to create a website used to recommend top 5 stocks based on market caps. Angular JS framework is used for frontend and spring boot is used for backend. Data is stored in MySQL Database.
- Technical Skills:** Java, SpringBoot, SQL, AngularJS

Resume Skills Extractor

Pune, India

Cummins College of Engineering for Women

- Created a resume parser which extracts technical and non-technical skills from a resume. It also tells which skill is trending among students and which is not.
- **Technical Skills:** Python with nltk, Spacy, pdfminer.

Phasor Telecontrol Unit

Pune, India

IG Drives and Systems

- Android application “Phasor Telecontrol Unit” which communicates with a GSM Module and displays data received after necessary calculations. Used SQLite database to store the data.
- **Technical Skills:** Android Java, XML, SQL.

Morse Code Generator

Pune, India

Cummins College of Engineering for Women

- Android application for generating Morse Code and Converting Morse code in Human readable format. IDE used here is Android Studio and Language is Java
- **Technical Skills:** Android Java, XML, Data Structures

Virus Detection and Bed Provision

Pune, India

Cummins College of Engineering for Women

- Created a quiz-based virus detector along with provision of nearest hospital with a bed available, in a team of three. Data structures used were tree for making decisions and graph for getting nearest hospital
- **Technical Skills:** Java, Data Structure
