SUMMARY

With over 2.5 years of experience as an Engineering Associate, I have developed a strong proficiency in programming languages including Java, Python, and C++. As a software developer, my passion lies in algorithms, logical problem-solving, and full-stack development. I aim to bring a unique blend of technical expertise and creativity to every project. Continually seeking to enhance programming skills, I actively expand my knowledge base, keeping up with market trends and breakthroughs, while exploring new and upcoming technologies.

EXPERIENCE

SDE - II

Goldman Sachs

📅 08/2022 - Present 📍 Hyderabad, India

Financial services and investment management company

- Developed and implemented a data integration pipeline to source data from system, transform it, and store it in the output system. Utilized Kafka for real-time data streaming and message brokering, Apache Flink for data streaming, Kubernetes for container orchestration, and Spring Boot for building microservices. Ensured seamless data flow and scalability by leveraging distributed architecture, enhancing system reliability and performance.
- Led a project to transition the DAO layer from SQL to NoSQL, specifically MongoDB
- Enhancement of security protocols by implementing OAuth authentication.

Intern

Goldman Sachs

📅 06/2021 - 07/2021 📍 Bangalore, India

Internship in a financial services company

- Worked on a project that integrated Angular frontend with a Java backend using ReactiveX. Built a listener to detect incoming emails and update the UI in real-time with new entries. Ensured seamless user experience by leveraging reactive programming for efficient data flow.

EDUCATION

BTech in Computer Engineering

Cummins College of Engineering for Women

📅 08/2018 - 05/2022 📍 Pune, Maharashtra

KEY ACHIEVEMENTS

Achievement in Astronomy Competition

Qualified the Pre-final Round of the International Astronomy and Astrophysics Competition in 2020

INTERESTS

Reading Novels

Avid reader who enjoys exploring various novels.

Watching Sci-fi Series

Enjoys watching sci-fi series that explore alternate realities and parallel universes
